1. Scope of application and applicable standards

This certification implementation plan applies to the certification of seismic bracing products for buildings. Certification basis:

GB/T 37267-2018 General Technical Requirements for Seismic Bracing and Hangers in Buildings

2. Authentication Mode
The certification process consists of: initial factory inspection + product sampling inspection + post-certification surveillance.

3. Certification Implementation Stages and Requirements

3.1 Certification Process:

The basic certification process includes:

- a) Certification application
- b) Initial inspection
- c) Product sampling inspection
- d) Evaluation and approval of certification results
- e) Post-certification surveillance

Note: The initial factory inspection includes document and technical review and on-site inspection.
