Greenhouse Gas Management System Implementation Rules

1.Purpose and Scope

1.1 This rule is used to regulate greenhouse gas emissions management throughout the product's life cycle. System certification (CCFP) activities.

1.2 This rule is based on relevant laws and regulations concerning certification and accreditation, and in conjunction with relevant technical standards.

The document specifies the procedures for CCFP certification and clarifies the relevant responsibilities involved. The CCFP certification process is standardized and effective.

1.3 These rules are the basic requirements for this organization in CCFP certification activities. Actions must comply with these rules.

2.Management requirements of this organization

2.1 This organization follows GB/T 27029—2022/ISO/IEC 17029:2019 "Conformity Assessment"

The "General Principles and Requirements for Auditing and Certification Bodies" were established to manage the capabilities involved in CCFP certification process;

Our organization has established internal checks and balances, oversight, and accountability mechanisms to ensure the effective implementation of CCFP training, certification, and recognition.

The decision-making and other processes are separated to ensure fairness.

3.Certification personnel requirements

3.1 Personnel participating in CCFP certification activities should possess the necessary personal qualities and a warm climate.

Education, training, and/or work experience in areas such as physical examination and auditing services certification and auditing.

3.2 Certification personnel participating in CCFP certification should meet the following conditions:

(1) Comply with the requirements of relevant laws, regulations and normative documents on certification and accreditation, and possess the qualifications to engage in certification and accreditation work. The basic professional ethics of certificate work.

(2) Obtain formal management system and greenhouse gas certification from the China Certification and Accreditation Association (CCAA). Nuclear personnel qualification.

(3) Maintain appropriate capabilities to carry out product carbon footprint management system certification work.

(4) Certification personnel shall be responsible for the authenticity, accuracy, and validity of certification activities and their results. They are responsible for ensuring that no actions occur that could compromise the impartiality of the certification process.

4 Certification basis
